Swarm

Swarm is an app where you can check in places for Foursquare

Pros
-clean interface
-organized

Cons
-too much navigation buttons
-don't understand what those icons represent

Improvements
-navigation buttons needs to be listed as drop down menu with one button
-easy to understand iconography

My Entity

It is a website where we offer technical support to all classic pc games. In other words, we won't turn away from answering any of your questions concerning your classic pc games. Most technical support in game companies will not help with games that are too old to play on new computer systems/operating systems. That's where my project steps in.

We also offer an app version of Dr. Gamer so that people who have mobile phones of tablets can play while they are on the go. That way retro gamers won't have to be seated at a computer to play their favorite games all the time.

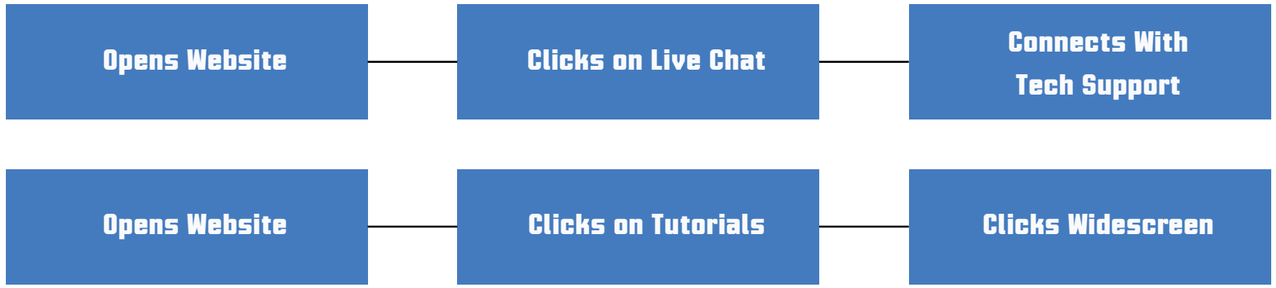
Personas

Name: Bob Gender: Male Age: 30

Devices Used

Laptop

He played games since 1987. He loves the classic first-person shooter games. He has a Windows 7 computer and has issues playing with Starcraft and Warcraft. He also wants widescreen support for some of his classic games.



Name: Susan Gender: Female Age: 24

Devices Used

Desktop/Laptop
iPhone

Susan has a lot of old games. She loves DOS games. She even has full collection of them. She plays DOS games on her computer, but most of the time she is always on the go. She spends more time on her iPhone
